This section to be completed and signed by the student PRIOR TO asking a health care professional to complete the Medical Documentation Form

Consistent with the Ontario Human Rights Commission's Guidelines on Accessible Education, you are not required to disclose your physical, sensory and medical disability diagnosis in order to register with Physical, Sensory and Medical Accessibility Services and to receive academic accommodation. The Ontario Human Rights Commission recognizes that Disability Services Offices have expertise in dealing with accommodation issues in the academic environment, and as such, can play a vital role in assisting with the accommodation process. If you wish to, you may voluntarily disclose your diagnosis to Glendon Accessibility Services.

Providing your diagnosis may be required to establish eligibility for certain federally or provincially-funded bursaries and grants and privately funded external scholarships and financial awards. This Form can be used to establish eligibility for such financial assistance, provided you have consented to the disclosure of your physical, sensory and medical diagnosis.

If you choose to consent to the disclosure of your diagnosis, you must check the box below. Your consent will allow your Health Care Practitioner to complete the relevant section of the Form.

Dear Health Care Practitioner,

You have been asked by a student who wishes to register with Physical, Sensory and Medical Accessibility Services at York University to complete the enclosed documentation. Accessibility Services is an educational support program only. It is meant primarily for students who live with a chronic, persistent and permanent physical, sensory or medical health disability and who are involved in university education. Significant temporary physical, sensory and medical disabilities can also be accommodated through our office. Interim accommodations may be provided for students who are in the process of being assessed for a physical, sensory and medical disability. As you know, the post-secondary environment involves taking examinations, doing research, completing assignments, and assuming responsibility for one's higher education pursuits. The purpose of the medical/psychological documentation is to enable Accessibility Counsellors to recommend appropriate academic accommodations for students with disabilities.

We are accountable under the *Ontario Human Rights Code* and *York's Senate Policy on Accommodating Students with Disabilities*. These guidelines help us provide academic accommodations that level the playing field for students with disabilities without creating an unfair advantage or undermining academic integrity. **We rely on your detailed knowledge of this student's disability, including a list of the functional limitations and restrictions that may impact their education together with your recommendations for appropriate academic accommodations.**

Thank you for helping to reduce barriers for students with disabilities while upholding the academic standards of the university.

This form must be completed by a licensed medical practitioner or registered psychologist.
