The artificial intelligence revolution places us on the edge of change comparable to the rise of human life on earth. Thus, the focus of this lecture series will be on how this change will re-shape the core components of our society and ourselves from our careers to our institutions to our ethics. What sort of future will we end up with: utopia or dystopia? What level of control do we humans still have?

Jean-Gabriel Castel

Fellow, Royal Society of Canada
and Distinguished Research
Professor Emeritus, Osgoode
Hall Law School, York University

Matthew Castel

Educational Experience
Manager, BrainStation and
General Partner, Logos LP
